IF THERE IS A PROBLEM WITH THIS TRANSMITTAL, PLEASE CALL 850 386-7022

RESUME

ROBERT B. SELLERS, P.E.

May 5, 2005

My experience includes many aspects of engineering design including overseeing survey data collection, permitting, site development and construction inspection. Included in my experience is development of "single structure" sites such as restaurants, banking facilities, medical offices and other professional offices, as well as "multi-structure" sites such as apartment and retail developments and commercial and residential subdivisions. I have over 35 years of practical, hands-on experience in the civil engineering field, almost 25 years of which has been in the Leon County area.

A partial list of projects that I have been involved in the design and permitting of are:

- St. Andrews State Park - Sanitary sewer additions to Park
- Tabernacle Church of Christ - New church facility
- Calvary Chapel - New church facility
- Family Dollar Store - New retail facility
- Hanson Pipe & Products - New concrete pipe production facility
- Mahan Oaks Commercial Centre - New professional office park
- Shred-It - New industrial facility
- Old Bainbridge Road Apartments - 168 unit apartment complex
- Plantation Grove - Single family residential subdivision
- Centre Pointe - Commercial subdivision
- Tallahassee Redi Mix - New concrete batch plant
- Summerbrooke - Single family residential subdivision
- Southeast Regional Cancer Center - New medical facility

This partial list of projects not only indicates diversity in my experience but also my familiarity with the design and permitting requirements and needs in our area.
